

## FACILITIES DEVELOPMENT GOALS

In meeting its goals of high quality education and fiscal responsibility, the Board of Education will strive to develop district facilities in a manner addressing economic concerns, quality education needs, safety, durability, maintenance, insurance and flexibility.

Accordingly, the Board establishes the following broad goals for facilities development:

1. Integrate facilities planning with other aspects of district planning in a comprehensive program designed to support the Board's educational philosophy and instructional goals.
2. Address state learning standards and student educational needs in developing educational specifications for school buildings.
3. Design facilities for sufficient flexibility to permit program modification or the introduction of new programs.
4. Involve the community, district staff and experts in facilities development.
5. Design economically feasible facilities that meet student educational needs.
6. Seek all possible mechanisms for financing school facilities.
7. Provide adequate school space to accommodate future improvements in educational programs and services.
8. Consider the adaptability of school facilities for community use.

The Superintendent of Schools shall be responsible for establishing procedures to implement these goals and shall provide a status report to the board on a monthly basis.

## FACILITIES PLANNING

The Board of Education is responsible for the regular operation and orderly development of the school district's physical plant. For that reason, the Board requires that all occupied school facilities which are owned, operated or leased by the District comply with the provisions of the Comprehensive Public School Safety Program and the Uniform Code of Public School Building Inspections, Safety Rating and Monitoring as prescribed in Commissioner's Regulations. For this reason, the School District shall develop a Comprehensive Public School Building Safety Program in accordance with Commissioner's Regulations. In carrying out this responsibility, the Board is concerned with both short-term and long-range planning and shall develop a Comprehensive Public School Building Safety Program in accordance with Commissioner's Regulations.

The Superintendent of Schools shall be responsible for the formulation and implementation of the following plans for school building facilities:

- a. Comprehensive long-range facilities development plan, which will include an appraisal of the following: the educational philosophy of the District, with resulting administrative organization and program requirements; present and projected student enrollments; space use and State-rated student capacity of existing facilities; the allocation of instructional space to meet the current and future education program and service needs, and to serve students with disabilities in settings with non-disabled peers; priority of need of maintenance, repair or modernization of existing facilities, including consideration of the obsolescence and retirement of certain facilities; and the provision of additional facilities.
- b. Five-year capital facilities plan. A Districtwide building inventory, which will include information pertaining to each building including, but not limited to:
  1. Type of building, age of building, size of building;
  2. Rated capacity, current enrollment;
  3. List of energy sources and major systems (lighting, plumbing, electrical, heating); and
  4. Summary of triennial Asbestos Inspection reports.

## CONSTRUCTION SAFETY

The Board of Education recognizes the district's responsibility to provide a safe school environment for students and staff during construction and maintenance projects.

The Superintendent of Schools shall be responsible for ensuring that district procedures for safeguarding the safety and health of students and staff are consistent with state law and regulation, including the Uniform Code of Public School Building Inspections, Safety Rating and Monitoring and the Uniform Safety Standards for School Construction and Maintenance Projects. Specifically, the Superintendent shall be responsible for the following items at the specified phase of the construction project:

### Pre-Construction

1. Ensure proper planning for the safety of building occupants during construction or maintenance activities.
2. Hire a New York State licensed architect or engineer for projects costing more than \$5,000.
3. Ensure safety issues are addressed for bid specifications and contract documents.
4. Provide notice to parents, staff and the community in advance of any construction project costing \$10,000 or more to be conducted in an occupied school building. The notice is to be given at least two months prior to date on which construction is to begin, except in the case of emergency construction projects, in which case notice will be given as soon as practical. The notice will provide information on the district's obligation to provide a safe school environment during construction projects. The notice may be given by publication in the district newsletter, direct mailings, or by holding a public hearing on the project.
5. Revise the district's emergency management plan, when appropriate, to accommodate the construction process including a revised emergency exit plan and emergency evacuation and relocation procedures during the construction process.

### During Construction

1. Monitor construction and maintenance activities to check for safety violations and to ensure that certificate of occupancy requirements are continuously maintained.
2. Ensure that all areas to be disturbed through renovation or demolition are tested for lead and asbestos.
3. Investigate and respond to health and safety complaints.

4. Conduct fire drills during construction to familiarize students and staff with revised emergency procedures.
5. Ensure compliance with statutory and regulatory requirements regarding noise abatement, exits, ventilation, air quality, fire and hazard prevention, chemical fumes, gases and other contaminants, asbestos abatement and lead paint and radon testing and mitigation.

Post Construction

1. Conduct a walk-through inspection with the Health and Safety Committee to confirm the area is ready to be reopened for use.

**CONSTRUCTION SAFETY EXHIBIT**

**Notification of Construction**

To: Faculty, Staff, Parents/Guardians, Students and other concerned parties

Date:

The \_\_\_\_\_ School District anticipates conducting a construction project commencing on \_\_\_\_\_. The project will be conducted at the \_\_\_\_\_ (name and address of school). The project will consist of the following: \_\_\_\_\_  
\_\_\_\_\_.

In furtherance of the district's commitment to safety and in accordance with regulations of the Commissioner of Education, the district will provide a safe school environment throughout this project. This will include an update of the school emergency plan to reflect any temporary exits or procedures needed as a result of the construction work at the school. Fire drills will be held to familiarize students and staff with any temporary exits. The construction area will be separated from occupied areas of the building, all kept to a minimum while the building is occupied. All applicable federal and stated rules and regulations will be strictly adhered to throughout the length of this project.

Specific questions or concerns about this project may be directed to \_\_\_\_\_ at \_\_\_\_\_ (telephone number).

Sincerely,

Building Principal
